

Environmental Management Review

Record of Decision

Community Outreach:

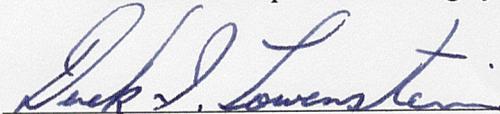

- C-A management will encourage additional C-A staff participation in the Envoy Program and other community outreach programs such as the BNL Speakers Bureau.

Achieving Objectives:

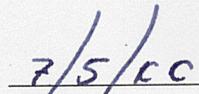

- C-A management will better define and allocate resources to the Sitewide Materials Disposition Project.
- The C-A Department will focus on closing out e-training requirements during July.

Additional Internal Performance Measures To Be Established:

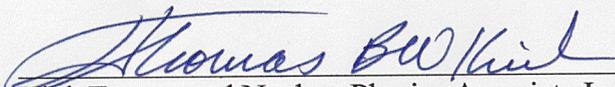

- The C-A Department will have an objective to prevent groundwater contamination from activated soils. This shall be measured via the groundwater-monitoring program. A near-term goal shall be to finalize the cap design specification and fully implement. Additional goals shall be to ensure adequate preventive maintenance, and adequate documentation of the cap design.
- The C-A Department will have an objective to reduce legacy materials. A goal to fully track and characterize existing legacy materials shall be set. A goal to eliminate materials that could become potential legacy waste issues (e.g., high z materials, Be) shall be set.
- The C-A Department will have a goal to create a uniform tracking system for all internal assessment findings. This shall be measured by the reduction in the number of separate tracking systems at C-A.
