

## ZDR for eRHIC:

- Physics with eRHIC  Physicists

- Physics with EIC
  - Detector concepts

- Accelerator Design

- Hadron beam  BNL

- RHIC
    - Electron cooling
    - ...

- Electron beam  MIT, BNL

- Injector ( polarized source, linac, recircul)
    - Storage ring (polarization, polarimeters)

- Interaction Region  BNL

- ...

## ZDR for eRHIC:

- Organization and management  **BNL, MIT**
- Appendices  **BNL, MIT**
  - Linac-Ring option for EIC (upgrade)  **BNL**
  - Technical Issues
    - Controls system
    - ....

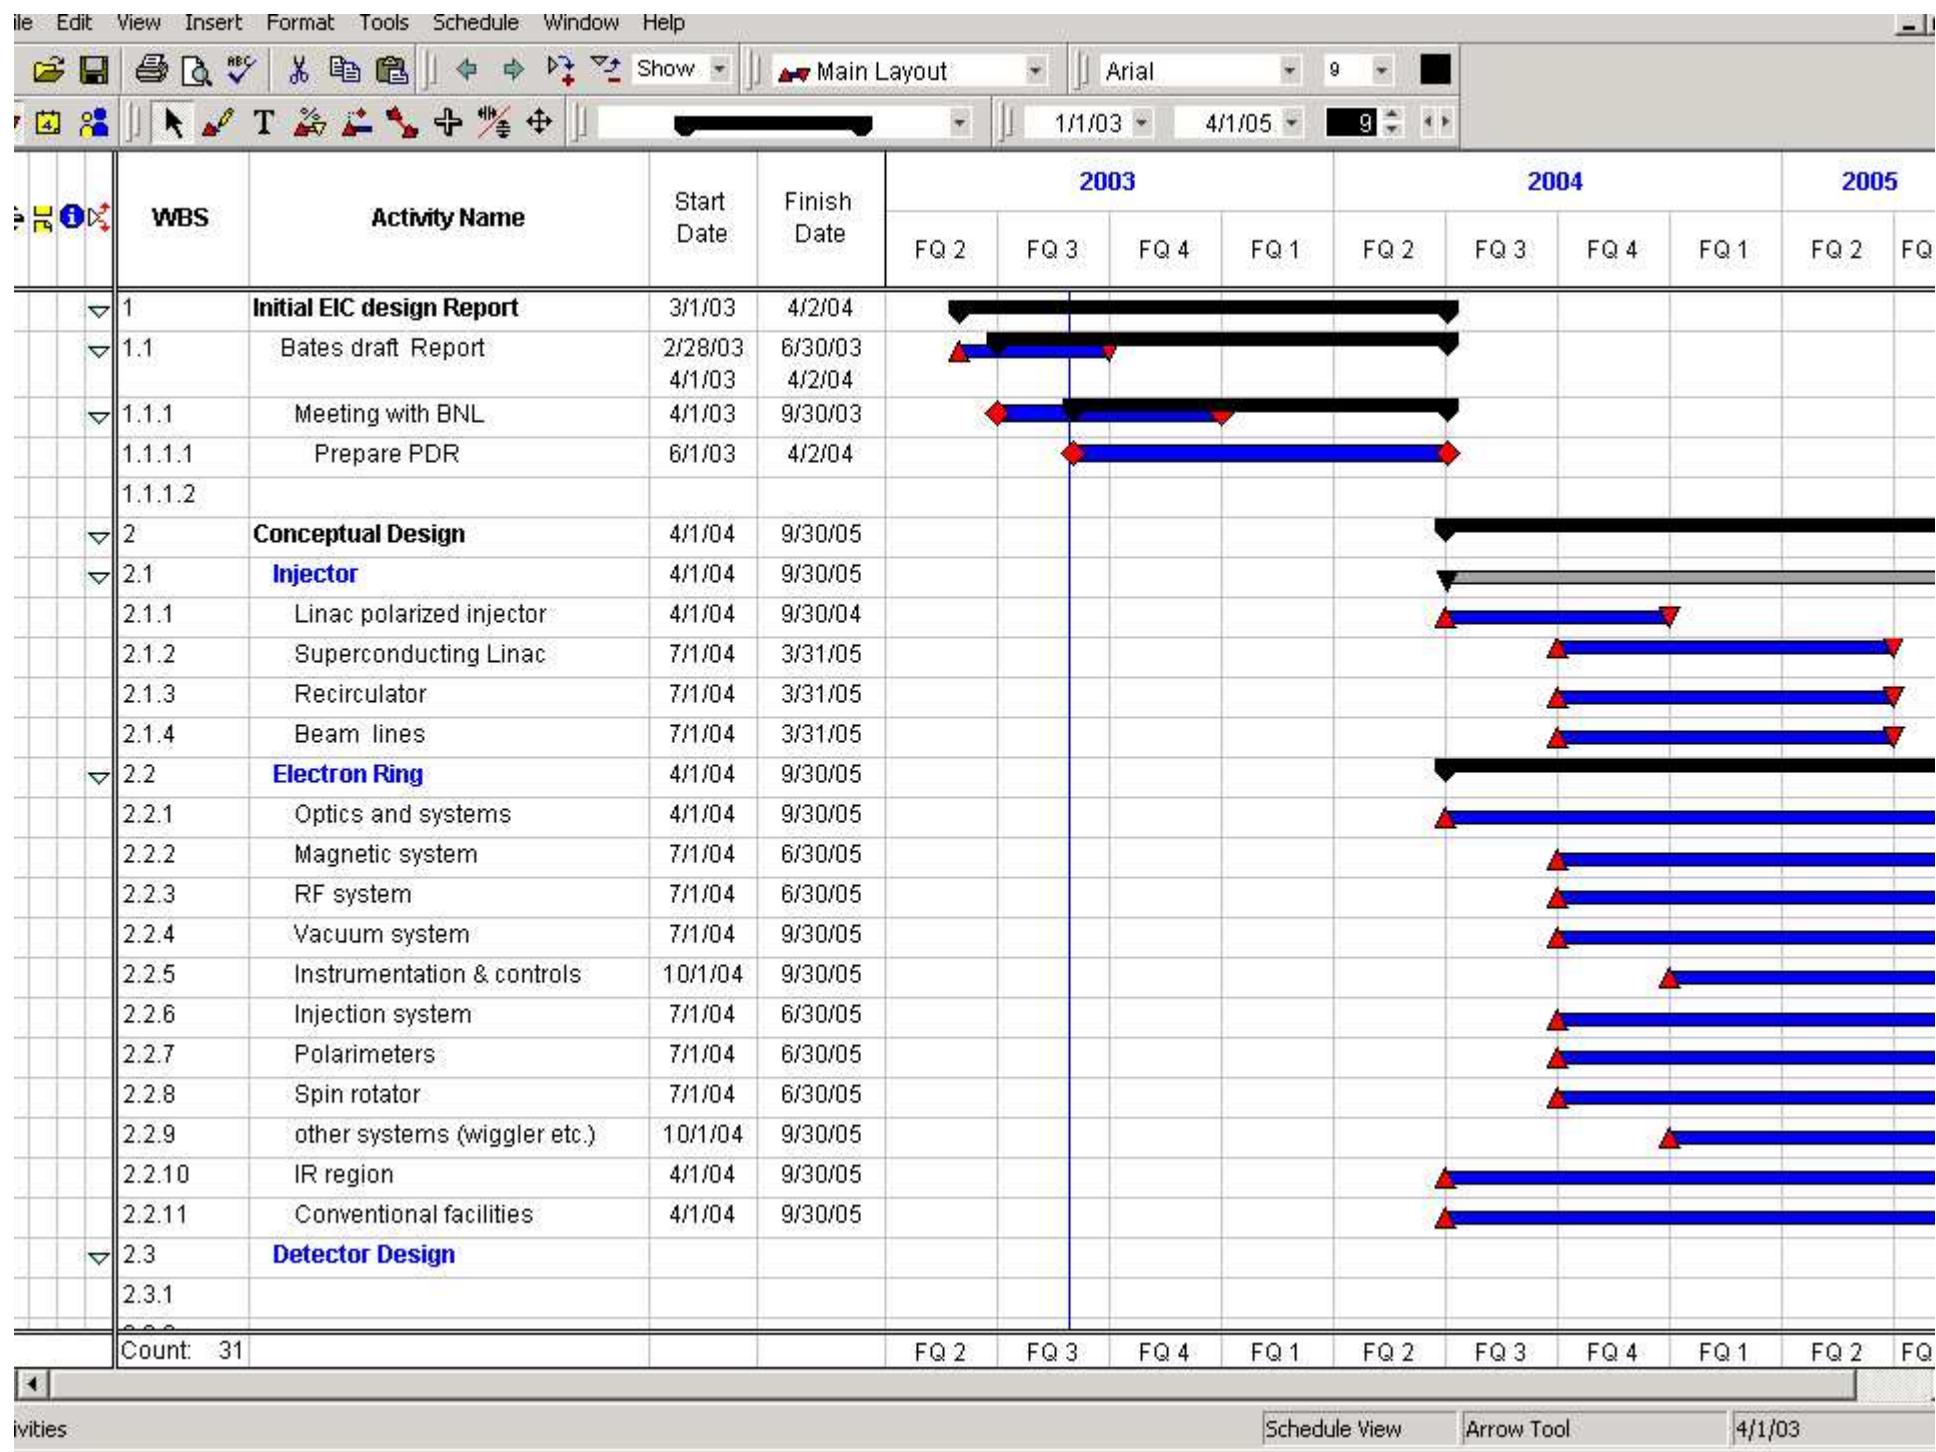

**For the ring-ring option:**

We propose MIT-Bates to coordinate the ZDR efforts on the electron beam from the injector up to the IR . This clearly means the involvement/interaction of BNL as well.

## • ZDR Preparation

(June-December 2003)

- Table of content
- Time table, work assignments
- Collaboration meetings:
  - videoonferencing: How often ? (biweekly)
  - Face to face meeting How often ? (monthly)
- A web page for ZDR document in progress  
(password protected)
- review of ZDR document(?)
- .....
